

To use the Loo.

1. Before use, make sure that there is enough water in the bowl to prevent the loo paper becoming compacted.
2. If the bowl is empty, move the *Flush Control* lever to the open position (**left**) and pump the handle up and down until the flushing pump is primed and water enters the bowl.
3. Shut the *Flush Control* (**right**).
4. Do your business. Do not use loads of loo paper - it will only block up.
5. During use, pump as necessary to keep the contents of the bowl low enough for comfort.
6. After use, keep the *Flush Control* shut (**right**) and pump until the bowl is empty.
7. When the bowl is empty (allow 7 complete up/down strokes), open the *Flush Control* again (**left**), and continue to pump until all the waste has left the boat.
8. Then shut the *Flush Control* (**right**) and pump until the bowl is empty.
9. Always leave the bowl empty to minimise odour and spillage.

If you block the Loo it will be your job to unblock it!!
